Response to Amendment

The following is in response to the amendment filed on January 3, 2002.

Claims 1-35 and 38-48 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest making an electret web from non-conducting polymeric fibers by forming the web, wetting with a wetting liquid, saturating the web with an aqueous polar liquid (such as water), and drying the web. Prior art methods of making an electret web from non-conducting fibers impart a charge on the surface of the fibers by high energy means, such as by an applied current or voltage or corona charging, or by friction of surfaces treated with a surfactant or polar compound (triboelectric charging), or by high pressure impingement of jets of water onto the web. Neither method teaches wetting the surface of the fibers with a wetting liquid to allow for a low energy means of charging the fibers with a polar liquid.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
